Adaptive & Resilient Infrastructures **driven** by Social Equity

What are your **community** needs?

How do you define **resilience**,
and how do you **plan** for it?

Your ideas can make a difference.
We want to partner with you!

What is ARISE?

We build capacity to help Kansans suffer less and rebound faster from disasters. This project is rooted in community involvement and education for statewide benefits. Our team comes from 17 colleges and universities in Kansas, bringing together knowledge in computer science, economics, engineering, public policy, psychology, and more.

Connect with us

We are actively seeking partners in Ford, Finney, Johnson, Seward, & Wyandotte counties. From utility providers to educators, church leaders to librarians, city workers to business owners — we invite local residents of all walks of life to join us in co-creating resilience for your community.

Your partnership means you are steering research.

Opportunities for partners

- Gain technical assistance for analyzing your data.
- Connect with researchers at multiple institutions.
- Apply for funding infrastructure resilience analysis projects.
- Share your perspective on a focus group and be compensated.

ARISE is a major, 5-year investment in Kansas by the U.S. National Science Foundation (NSF) Established Program to Stimulate Competitive Research (EPSCoR). NSF uses EPSCoR to ensure every citizen has access to STEM experiences by increasing research capacity in traditionally underfunded regions of the country—like Kansas. For every dollar it invests in Kansas, the state gets back twice that in non-EPSCoR funding. Any opinions, expressed here are those of the author(s) for this project (OIA-2148878), and do not necessarily reflect the views of NSF.
